

## Anwenderinformation für das Modul „Orthopädie und Unfallchirurgie - Hüftgelenkversorgung (Sozialdaten)“

### Version

|                |                                                         |
|----------------|---------------------------------------------------------|
| Spezifikation  | <del>2026</del> 2027_SDAT_KK_RB_XML_ <del>V04</del> V01 |
| Erfassungsjahr | 2026                                                    |

Der Patientenfilter, der die entsprechenden dokumentationspflichtigen Behandlungsvorgänge selektiert, legt die zu exportierenden Fälle/Patienten fest. Diese Datenbasis stellt die Grundgesamtheit der QS-Vorgänge dar.

Anschließend muss für einen bestimmten Zeitraum das Auftreten bestimmter Diagnosen, Eingriffe, Abrechnungskodes und Verordnungen geprüft werden (Leistungs- und Medikationsfilter).

Die Datenfelder sind gemäß ihrer Eingangskennung in der Allgemeinen Spezifikation für Sozialdaten bei den Krankenkassen angegeben, die sich an den Technischen Anlagen zum Datenaustausch der Leistungserbringer orientiert:

[Funktion].[Datenquelle].[Datensatz].[Segment].[Gruppe].[Feldkennung]@Attributname

**Beispiel:** 301.Entlassungsanzeige.FAB.Operation.Prozedurenschlüssel@ops

Diese Kennung bezeichnet das Attribut „ops“, das in der Entlassungsanzeige des Datensatzes nach §301 im FAB-Segment in der Gruppe „Operation“ mit der Feldkennung „Prozedurenschlüssel“ zu finden ist.

Diese Kennzeichnung ermöglicht den direkten Bezug zu den Eingangsdaten. So ist gewährleistet, dass die zu selektierenden Datenfelder von den Krankenkassen eindeutig referenziert werden können.<sup>1</sup>

<sup>1</sup> Das vorliegende Dokument wurde maschinell erstellt und kann kleinere Formatfehler beinhalten.

## Pseudocode der QS-Filter

|                        | Pseudo-Code                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Beschreibung                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
